3rd edition

CTAO Science Symposium

The Cherenkov Telescope Array Observatory (CTAO) invites astronomers, particle physicists, and multi-wavelenght/multi-messenger (MWL/MM) partners to the CTAO Science Symposium, hosted at the 33rd IAU General Assembly. Join us as we explore the future of high-energy astronomy and forge new synergies.

We also invite abstract submissions for talks and posters covering a wide range of thematic areas: cosmic particle accelerators, the transient and variable sky, MWL/MM synergies, fundamental physics, dark matter, and CTAO capabilities and early science.

10-13 August 2027 **Parco della Musica** **Rome, Italy**
